**WEEK 5**

**Goal: Stay Healthy Advanced**

**Gym Days: 5 (pick whichever 5 days of the week you can work out)**

---

**CARDIO AND STRENGTH**

This challenging strength routine, which is punctuated with cardio sessions, works the arms, legs and core.

**CARDIO SESSION 1 (1 time, before circuits)**

Warm up for 3 mins at an easy pace on the treadmill or elliptical.

**Circuit 1 (3 times; rest 1 min at end of each circuit)**

**WALKING LUNGE — 10 reps each leg**

Stand tall with your feet together. Take a large step forward with your right leg. Drop into a lunge, bending both knees to 90 degrees. Keep your torso upright with your chest up and shoulders back. Maintain your balance. Step forward and bring your feet together. Take another step forward with your left leg.

**DUMBBELL LATERAL RAISE — 10 reps**

Grab a pair of dumbbells and let them hang at your sides with your palms facing your body. Stand tall. Keeping your elbows slightly bent, raise your arms straight out to the sides until they’re at shoulder level. Pause, then lower the weights back to the starting position.

**DUMBBELL BICEPS CURL — 10 reps**

Grab a pair of dumbbells and stand up straight with a tight torso. Allow the dumbbells to hang at arm’s length with palms facing forward. With feet shoulder-width apart, bend your elbows to curl the dumbbells upward to your shoulders. Pause for a second and slowly allow the weights to return to the starting position. Completely straighten your arms and repeat.

**CARDIO SESSION 2 (1 time, between circuits)**

**JUMP ROPE — 5 mins**

Use a rope that when folded in half reaches from your shoulders to the floor. Grip the handles and allow your arms to hang at a 45-degree angle at your sides. Step over the rope so that it’s hanging behind your feet. Use your wrists and hands to swing the rope over your head. Try not to move your arms much, if possible. As the rope comes toward your feet, jump slightly (called a skip) by pushing off the balls of your feet onto your toes.

CARDIO AND STRENGTH (CONT.)

Circuit 2 (3 times; rest 1 min at end of each circuit)

SINGLE-ARM STANDING CABLE REVERSE FLY — 10 reps each side

Stand next to an adjustable cable machine so that it is on your right. Hold the D-handle attachment with your left hand, palm facing your right oblique. Keep your left elbow tight to your side. Rotate your left shoulder by bringing the handle across your body until your arm is almost extended, then return to the starting position. Switch sides and repeat.

STEP-UP WITH DUMBBELLS — 10 reps each side

Stand behind a box or exercise bench. Hold a dumbbell in each hand at your sides and place your right foot on the box. Shift your weight onto your right leg to step onto the box. Keep the help from your left leg to a minimum. Finish by stepping onto the box with your left leg. Step your left leg down. Do all reps with your right leg, switch sides, then repeat.

TRICEPS DUMBBELL KICKBACK — 10 reps each side

Kneel over one side of a weight bench by placing the right knee and right hand on the bench. Position the left leg slightly back and to the side with the left foot firmly planted on the floor. The torso should be parallel to the floor. Grab a dumbbell with the left hand with an overhand grip, and position the elbow at your side so the upper arm is parallel to the floor. Now extend the left arm to full extension by contracting the triceps.

CARDIO SESSION 3 (1 time, between circuits)

JUMP ROPE — 5 mins

Use a rope that when folded in half reaches from your shoulders to the floor. Grip the handles and allow your arms to hang at a 45-degree angle at your sides. Step over the rope so that it’s hanging behind your feet. Use your wrists and hands to swing the rope over your head. Try to not move your arms much, if possible. As the rope comes toward your feet, jump slightly (called a skip) by pushing off the balls of your feet onto your toes.

JUMPING JACKS — 5 mins

Stand with your feet together and your hands at your sides. Simultaneously raise your arms above your head and jump your feet out to the sides. Immediately, reverse the movement and jump back to the starting position. Repeat for all reps.

**CARDIO AND STRENGTH (CONT.)**

**Circuit 3 (3 times; rest 1 min at end of each circuit)**

**PLANK — Hold for 1 min**
Lie facedown with your elbows directly beneath your shoulders. Raise your torso into the air until your body is a completely straight line from your shoulders to your ankles. Tighten your stomach, squeeze your glutes, and hold this position for the desired amount of time.

**SIDE PLANK WITH TWIST — 10 reps each side**
Lie on your side and position yourself on your bottom elbow and the side of your bottom foot. Lift your hips off the ground so your body forms a straight line from your shoulders to your feet. Brace your abs and squeeze your butt. Take your top arm and sweep underneath and slightly behind you. Your torso will twist forward; make sure to pivot your feet. Bring your arm back to the starting position as your body straightens out. Finish the rep with your shoulders square and your arm pointed toward the ceiling. Do all reps, switch sides and repeat.

**WEEK 5**

**Goal: Stay Healthy Advanced**

**Gym Days:** 5 (pick whichever 5 days of the week you can work out)

---

**DAY 1**

**CARDIO**

Do 30 mins of cardio on a machine of your choice—treadmill, elliptical or stationary bike. Begin with a 1-min warm-up at Zone 1, then maintain an exertion level between Zone 3 and Zone 4. (Zone 1 is a light warm-up, and Zone 5 is nearly maximum effort.)

---

**STRENGTH TRAINING**

**RESISTANCE-TRAINING CIRCUIT (3 rounds; rest 30 secs at the end of each round)**

Try this bootcamp-style resistance-training workout. Do these exercises in a circuit; that is, do 1 set of an exercise, then move on to the next exercise. The key is to keep your heart rate high by constantly moving, but make sure to rest as instructed between sets.

**OVERHEAD DUMBBELL SQUAT**

Hold a pair of dumbbells directly above your head at about shoulder-width apart. Your feet should be shoulder-width apart, too. Maintain a tight core, and begin to lower your hips by pushing them back, and then bending your knees. Make sure the dumbbells remain directly above your head during the entire movement. At the bottom of the movement, your knees should be at about 90 degrees. Pause for a second, and then push through your heels back to the starting position. Repeat until all prescribed reps are completed.

Round 1: 8 reps
Round 2: 10 reps
Round 3: 12 reps

**STRAIGHT-ARM LAT PULLDOWN**

Sit at a lat pulldown station and grab the bar with an overhand grip that’s just beyond shoulder width. Your arms should be completely straight and your torso upright. Pull your shoulder blades down and back, and bring the bar to your chest. Pause, then return to the starting position.

Round 1: 8 reps
Round 2: 10 reps
Round 3: 12 reps

### WEEK 5

**Goal:** Stay Healthy Advanced  
**Gym Days:** 5 (pick whichever 5 days of the week you can work out)

#### DAY 1

**STRENGTH TRAINING CONT.**

**PUSHUP WITH MEDICINE BALL**  
Grab a medicine ball and place it on the ground. Get in the standard pushup position with one hand on the floor and the other hand on top of the medicine ball. Your body should be in a straight line with your legs straight and toes pointing into the ground. Keeping your core tight, slowly lower yourself toward the ground. Make sure to keep your elbows tucked in close by your sides so they make a 45-degree angle with your torso. Once your chest nearly touches the ground, pause, and then press back up to the starting position. Roll the medicine ball beneath the other hand and perform the same movement. Repeat for the prescribed number of reps.  
**Round 1:** 8 reps each side  
**Round 2:** 10 reps each side  
**Round 3:** 12 reps each side

**STEP-UPS WITH DUMBBELLS**  
Stand behind a box or exercise bench. Hold a dumbbell in each hand at your sides and place your right foot on the box. Shift your weight onto your right leg to step onto the box. Keep the help from your left leg to a minimum. Finish by stepping onto the box with your left leg. Step your left leg down. Do all reps with your right leg, switch sides, then repeat.  
**Round 1:** 8 reps each side  
**Round 2:** 10 reps each side  
**Round 3:** 12 reps each side

**KETTLEBELL SWING**  
Hold a single kettlebell with both hands, using an overhand grip and keeping your feet shoulder-width apart. Bend your knees slightly while pushing your hips backward, pushing your chest out and hinging your torso until it is parallel with the floor. Explosively push your hips forward while squeezing your glutes, letting the momentum from this movement propel the kettlebell, not by using your arms.  
**Round 1:** 8 reps  
**Round 2:** 10 reps  
**Round 3:** 12 reps
