**Week 7**

**Goal:** Get Lean

**Gym Days:** 5 (pick whichever 5 days of the week you can work out)

---

**Day 1**

Focus: Cardio and Strength

Warm-up: 5 mins / brisk walk or jog on a treadmill

---

**CARDIO + STRENGTH TRAINING COMBINED**

**BOOTCAMP WORKOUT** (3 times; rest 30 secs at the end of each circuit)

**Mountain Climbers** — 40 reps each side

Get into the pushup position, keeping your arms completely straight and directly beneath your shoulders. Tighten your stomach and lift one foot off the floor, raising your knee up toward your chest while keeping your body in as straight a line as possible. Return to the starting position and repeat the movement with your opposite leg.

**Walking Lunges** — 15 reps each side

Stand tall with your feet together. Take a large step forward with your right leg. Drop into a lunge, bending both knees to 90 degrees. Keep your torso upright with your chest up and shoulders back. Maintain your balance. Step forward and bring your feet together. Take another step forward with your left leg.

**Medicine-Ball Wood Chop** — 15 reps each side

Stand with your feet shoulder-width apart. Hold a medicine ball or weight in front of your stomach. Squat down, keeping your knees out, chest up and shoulders back. Bring the ball to the outside of your right knee. Stand, and bring the ball across your body toward your left shoulder. Bring the ball to starting position. Do all reps, switch sides and repeat.

**Squat, Plank, Pushup** — 5 reps

Stand with the feet shoulder-width apart and toes pointed outward. Lower your hips until your thighs are parallel to the ground. Place your hands directly in front of you on the floor. Jump your legs back so that you’re in a full plank position. Keeping the elbows tucked close to the torso, descend into a pushup until your chest touches the ground. Jump your feet forward into a squat position and repeat.

**Week 7**

**Goal: Get Lean**

**Gym Days:** 5 (pick whichever 5 days of the week you can work out)

---

**Day 1**

**CARDIO + STRENGTH TRAINING COMBINED**

**SUPERMAN — 15 reps**

Lie facedown on the floor with your legs straight and arms out ahead of you. Your palms should be down on the floor. Squeeze your glutes and lower back to raise your upper body off the floor with your hands out in front of you. Simultaneously, lift your straight legs off the floor. Pause at the top for two seconds. Relax and return to the starting position.

**STEP-UPS WITH DUMBBELL — 15 reps each side**

Stand behind an exercise bench or box. Hold a dumbbell in each hand at your sides and place your right foot on the box. Shift your weight onto your right leg to step onto the box. Keep the help from your left leg to a minimum. Finish by stepping onto the box with your left leg. Step your left leg down. Do all reps with your right leg, switch sides, then repeat.

**PLANK — Hold for 45 secs**

Lie facedown with your elbows directly beneath your shoulders and raise your torso into the air until it’s a completely straight line from your shoulders to your ankles. Tighten your stomach, squeeze your glutes, and hold.

**BICYCLE SIT-UPS — Do continuously for 1 min**

Lie on your back with your knees bent and feet flat on the floor. Place your hands behind your head with palms toward your head. Bring your knees to your chest and raise your shoulders. Slowly move your legs in the air as if you’re riding a bike.

**SEATED CABLE ROW — 15 reps**

Sit at a low pulley cable station with a V-handle attachment. Place feet securely on the platform and, using your legs (not your back), sit back into the start position with your arms fully extended and supporting the weight. Keeping your torso stationary, drive your elbows past your back and pull the cable attachment toward the waist. Attempt to squeeze shoulder blades together and hold this contraction for a second. Return the weight until arms are fully extended, and repeat the movement. To end the set, return the weight to the starting position by bending at the knees and not the lower back.

**SQUAT JUMP — 12 reps**

Place your fingers on the back of your head and pull your elbows back so that they’re in line with your body. Dip your knees in preparation to leap. Explosively jump as high as you can. When you land, immediately squat down and jump again.

**DAY 1**

**Focus:** Cardio and Chest

**Warm-up:** 5 mins / brisk walk or jog on the treadmill

**CARDIO**

**ElliPtical**

30 mins / moderate

**Strength Training**

**Weight Circuit (Focus: Chest)**

*Pushup Superset (3 times; rest 1 min at the end of each circuit)*

**Pushup — 8 reps**

Get on all fours, and place your hands on the floor slightly wider than and in line with your shoulders. Your body should form a straight line from your ankles to your shoulders. Squeeze your abs as tight as possible and keep them contracted for the entire exercise. Lower your body until your chest nearly touches the floor, making sure that you tuck your elbows close to the sides of your torso. Pause, then push yourself back to the starting position.

**Judo Pushup — 8 reps**

Get in the pushup position with legs wider than hip-width apart and arms directly underneath your shoulders. Step feet in slightly toward your hands and lift your hips so that your body forms an inverted V. Keeping your core tight and elbows close to the body, bend your arms and lower your chest to the floor. At the bottom of the movement, swoop your head and shoulders upward while lowering your hips until they almost touch the floor. Reverse the motion and return to start.

**Upper-Body Supersets**

A *superset* means doing two consecutive exercises back to back without a rest. Use a low to medium weight that feels challenging. You don’t have to overdo it with weight because the workout includes lots of reps, continuing to build lean muscles and muscle endurance.

### STRENGTH TRAINING CONT.

**ALTERNATING DUMBBELL CURL**

Stand with feet shoulder-width apart, holding a dumbbell in each hand with an overhand grip and palms facing your sides. Curl the right dumbbell toward the right shoulder by flexing the elbow. The other dumbbell should remain at your left side. Try to minimize moving the elbow (shoulder flexion) or cheating with the lower back. As you curl the weight up, twist the pinky finger of the working arm toward the ceiling. This intensifies the contraction in the biceps. Hold at the top for 1 sec and return to the starting position, and then repeat the movement using the left dumbbell.

- Round 1: 12 reps each side
- Round 2: 10 reps each side
- Round 3: 8 reps each side

**Superset 3 (3 times)**

**CABLE CROSSOVER**

Begin in a staggered stance with your body positioned in the middle of a dual cable machine with one weight stack on either side of you. Adjust the handles so they’re slightly lower than shoulder height and grab the handles so your palms are facing forward and your arms are roughly parallel with the ground. Maintain a slight bend in the elbows. Contract your pecs and pull your arms together in front of you, keeping a slight forward lean from the waist up. Pause, and then slowly return the weight back to the starting position.

- Round 1: 15 reps
- Round 2: 12 reps
- Round 3: 10 reps

**INCLINE DUMBBELL FLY**

Lie on your back on an incline bench, holding a pair of dumbbells above your chest. Make sure your palms are facing toward one another, and keep your elbows slightly bent. Maintaining a slight bend in the elbows, slowly lower the dumbbells horizontally until your upper arms are parallel with the ground. Pause, then squeeze your pecs while bringing your arms back to the starting position. Repeat for the prescribed number of sets and repetitions.

- Round 1: 15 reps
- Round 2: 12 reps
- Round 3: 10 reps

### STRETCH SESSION
