**Goal: Build Muscle**

**Gym Days:** 5 (pick whichever 5 days of the week you can work out)

### DAY 1

**CARDIO**

Choose a machine that feels comfortable to you—a stationary bike, elliptical or treadmill. The level of intensity here varies between Zone 1 (lowest level; barely feel exertion) and Zone 5 (highest exertion level; maximum effort).

**Warm-up:** 3 mins / Zone 3
- Speed Interval: 30 secs / Zone 4
- Rest Interval: 2 mins / Zone 2
- Speed Interval: 30 secs / Zone 5
- Rest Interval: 1 min / Zone 3
- Speed Interval: 30 secs / Zone 4
- Rest Interval: 2 mins / Zone 2
- Speed Interval: 1 min / Zone 5

**Cooldown:** 30 secs / Zone 1

### STRENGTH TRAINING

**PUSHUP — 3 sets of 10 reps; rest 30 secs between sets**

Get on all fours, and place your hands on the floor slightly wider than and in line with your shoulders. Your body should form a straight line from your ankles to your shoulders. Squeeze your abs as tight as possible and keep them contracted for the entire exercise. Lower your body until your chest nearly touches the floor, making sure that you tuck your elbows close to the sides of your torso. Pause, then push yourself back to the starting position.

**SEATED CABLE ROW — 3 sets of 10 reps; rest 30 secs between sets**

Sit at a low pulley cable station with a V-handle attachment. Place feet securely on the platform and using your legs (not your back), sit back into the start position with your arms fully extended and supporting the weight. Keeping your torso stationary, drive your elbows past your back and pull the cable attachment toward the waist. Attempt to squeeze shoulder blades together and hold this contraction for a second. Return the weight until the arms are fully extended, and repeat the movement. To end the set, return the weight to the starting position by bending at the knees and not the lower back.

Days: 5 (pick whichever 5 days of the week you can work out)

Day 1: Strength Training

**Dumbbell Front Raise** — 3 sets of 12 reps; rest 30 secs between sets
Stand tall with your feet hip-width apart, holding a dumbbell in each hand in front of your thighs. Your palms should face toward you. Raise your arms in front of you, pausing once the dumbbells reach shoulder height. Return the weights to the starting position.

**Lat Pulldown** — 3 sets of 12 reps; rest 30 secs between sets
Sit at a lat-pulldown station and grab the bar with an overhand grip that’s just beyond shoulder-width. Your arms should be completely straight and your torso upright. Pull your shoulder blades down and back, and bring the bar to your chest. Pause, then return to the starting position.

**Single-Arm Triceps Extension** — 3 sets of 12 reps; rest 30 secs between sets
Stand with feet shoulder-width apart and holding a dumbbell with one hand. Bracing your abs, press the dumbbell overhead by extending your arm. This is your starting position. Lower the dumbbell by bending your elbow so that it sticks out to the side. Get a good stretch in the triceps and stop just shy of the dumbbell touching your neck. Pause the dumbbell for 1 second in the bottom position and then extend them back to the starting position by contracting the triceps.

**Mountain Climber** — 3 sets of 30 reps; rest 30 secs between sets
Get into the pushup position, keeping your arms completely straight and directly beneath your shoulders. Tighten your stomach and lift one foot off the floor, raising your knee up toward your chest while keeping your body in as straight of a line as possible. Return to the starting position and repeat the movement with your opposite leg.

STRENGTH TRAINING CONT.

LATERAL SQUAT — 3 sets of 10 reps each side; rest 30 secs between sets
Begin by standing tall with your heels pressed together, turning your toes out to 45 degrees. Keep your hands on your hips for support. Slide your right foot out further than hip width, keeping your left foot in the same position, and descend into a squat position. Make sure to keep your chest pushed out and abs tight the entire time. Rise out of the squat position, sliding your leg back to the starting position before repeating with your opposite side.

SPLIT SQUAT WITH DUMBBELL — 3 sets of 10 reps each side; rest 30 secs between sets
Hold a pair of dumbbells at arm’s length next to your sides, your palms facing each other. Stand in a staggered stance, your left foot in front of your right. Slowly lower your body as far as you can. Your rear knee should nearly touch the floor. Pause, then push yourself back up to the starting position. Complete the prescribed number of reps, then do the same number of reps with your right foot in front of your left.

STANDING CALF RAISE — 3 sets of 12 reps; rest 30 secs between sets
Stand on a box or stair with your heels and mid-foot hanging off the edge. Use a wall or rail to stay balanced. Raise your heels as high as possible, pause, and then lower them back into the starting position. Repeat.

REVERSE CRUNCH — 3 sets of 15 reps; rest 30 secs between sets
Lie on your back with your knees together and your legs bent to 90 degrees, feet planted on the floor. Place your palms facedown on the floor for support or cross over your chest. Bring your knees into your chest, tightening your abs to lift your hips off the floor. Pause at the top before lowering your legs as close to the ground as possible without allowing your lower back to arch and lose contact with the floor. Return to the starting position.

CRUNCH — 3 sets of 20 reps; rest 30 secs between sets
Lie flat on your back, placing your hands behind your head or crossing them over your chest. Bring your feet close to your glutes so your knees are bent and your feet are flat on the ground. Tighten your abs and lift your shoulders and upper back off of the ground. Squeeze your abs at the top of the movement and hold for one second. Return to starting position and repeat.

**CARDIO**

Do an indoor cardio triathlon!

**ELLIPtical (10 mins)**

A traditional triathlon starts with swimming, but for our indoor version try an elliptical machine that provides a highly efficient low-impact workout. Think of this portion as your warm-up to the bike and run, and be sure to keep your head and body upright.

**BIcycle (10 mins)**

To gain maximum cycling benefits, properly align yourself before you start. Adjust the seat so that your knees have a slight bend when extended. Find a comfortable resistance that allows you to maintain around 80 revolutions per minute.

**TREADmill (10 mins)**

Because your legs will likely feel a little rubbery after the bike ride, ease into the run. In fact, you should feel free to start with 1 or 2 mins of walking or jogging to get going. Once you’re in a groove, build up speed.

---

**STRENGTH TRAINING**

Plyometric workouts utilize jumps, hops and rapid movements to engage muscle groups in your core and lower and upper body—at times simultaneously—to increase balance and strength.

Do 3 sets of each of these exercises in this order, resting for 1 min between each set.

**SQUAT JUMP ONTO BOX — 10 reps**

Stand in front of a 12-inch box, or a stabilized weight bench. Push your hips back, squat down and jump with both feet onto the box. Jump off the box, reset and repeat the movement.
