*Circuit 1 (3 times; rest 30 secs at the end of each circuit)*

**WALKING HIGH KNEE — 15 reps each side**  
Stand tall, your hands hanging at your sides. Lunge forward with your right foot in front of you and your left foot behind you as you reach your left arm skyward and bring your right arm down and slightly behind you. Reverse the motion, going back and forth.

**LATERAL STEP OVER — 12 reps each side**  
Stand tall with a bench to your right side. Raise your right knee and laterally step your right foot over the bench. Immediately follow the movement with your left leg, so that you end up on the other side of the bench. Repeat to the other side.

*Circuit 2 (3 times; rest 30 secs at the end of each circuit)*

**HIGH-PULL BURPEE — 8 reps**

**Day 1**

**CARDIO + STRENGTH TRAINING COMBINED**

**KNEELING DUMBBELL REAR FLY — 15 reps**
Grab a set of dumbbells and get on all fours on the ground. Grip the dumbbells directly beneath your shoulders with your palms facing each other. Make sure your knees are directly beneath your hips. Maintaining a slight bend in the elbow, lift one arm straight out to the side until it is parallel with the ground. Keep your back flat and core tight the entire time. Pause, and then lower the weight back to the starting position. Repeat for the prescribed number of sets and repetitions and then switch arms.

**DUMBBELL ROW — 15 reps**
Stand with feet shoulder-width apart and holding a dumbbell in each hand. Bend the knees slightly and bend at the waist with your back straight. Avoid rounding the upper back, and keep the head neutral. Extend your arms fully so each dumbbell is just above the floor. Contract your back and pull both dumbbells up to your rib cage. Be sure to pull through the elbow and hold for one second in the top position. Lower the dumbbells to the fully extended arm position and repeat.

**TRICEPS DUMBBELL KICKBACK — 15 reps each side**
Kneel over one side of a weight bench by placing the right knee and right hand on the bench. Position the left leg slightly back and to the side with the left foot firmly planted on the floor. The torso should be parallel to the floor. Grab a dumbbell with the left hand with an overhand grip, and position the elbow at your side so the upper arm is parallel to the floor. Now extend the left arm to full extension by contracting the triceps.

---

**Circuit 3 (3 times; rest 1 min at the end of each circuit)**

**MODIFIED SIT-UP — 25 reps**
Lie on your back with your knees bent to 90 degrees and feet flat on the floor. Keep your arms straight against your sides, palms facing down and hovering slightly above the floor. Tighten your abs and raise your torso until you’re sitting up at a 45-degree angle, pausing for a moment before returning to the floor. Perform all reps.

**Gym Days: 5 (pick whichever 5 days of the week you can work out)**

**DAY 1**

**CARDIO + STRENGTH TRAINING COMBINED**

**HOVERING SIT-UP – 20 reps**
Start by sitting with your feet and upper back off the ground and knees bent toward your chest, placing your hands behind your head for support and balance. Make sure not to pull at your neck. Tighten your abs and straighten your legs out completely while leaning back, touching your lower back to the ground while making sure that your shoulders remain in the air. Use your abs to crunch up and return to the starting position, repeating for the desired number of repetitions.

**SWISS BALL RUSSIAN TWIST – 15 reps each side**
Lie with your back on a Swiss ball. Your feet should be flat on the floor with your knees bent at 90 degrees. Clasp your hands together directly above your chest with straight elbows. Carefully rotate your arms to the side. The ball will roll across your back to your shoulder. Keep your hips up by squeezing your glutes. Rotate back to the starting position. Repeat on the opposite side. Complete all reps.

**SIDE PLANK WITH TWIST – 12 reps each side**
Lie on your side and position yourself on your bottom elbow and the side of your bottom foot. Lift your hips off the ground so your body forms a straight line from your shoulders to your feet. Brace your abs and squeeze your butt. Take your top arm and sweep underneath and slightly behind you. Your torso will twist forward; make sure to pivot your feet. Bring your arm back to the starting position as your body straightens out. Finish the rep with your shoulders square and your arm pointed toward the ceiling. Do all reps, switch sides, and repeat.

#### STRENGTH TRAINING

**WEIGHT CIRCUIT (Focus: Chest)**

**Pushup Superset (3 times; rest 1 min at the end of each circuit)**

**PUSHUP – 15 reps**

Get on all fours, and place your hands on the floor slightly wider than and in line with your shoulders. Your body should form a straight line from your ankles to your shoulders. Squeeze your abs as tight as possible and keep them contracted for the entire exercise. Lower your body until your chest nearly touches the floor, making sure that you tuck your elbows close to the sides of your torso. Pause, then push yourself back to the starting position.

**JUDO PUSHUP – 12 reps**

Get in the pushup position with legs wider than hip-width apart and arm directly underneath your shoulders. Step feet in slightly toward your hands and lift your hips so that your body forms an inverted V. Keeping your core tight and elbows close to the body, bend your arms and lower your chest to the floor. At the bottom of the movement, swoop your head and shoulders upward while lowering your hips until they almost touch the floor. Reverse the motion and return to start.

**UPPER-BODY SUPERSETS**

A **superset** means doing two consecutive exercises back to back without a rest. Use a low to medium weight that feels challenging. You don’t have to overdo it with weight because the workout includes lots of reps, continuing to build lean muscles and muscle endurance.

**DUMBBELL SQUAT — 15 reps**

Hold a pair of dumbbells at arm’s length next to your sides, your palms facing each other. Brace your abs, and lower your body as far as you can by pushing your hips back and bending your knees. Pause, then push back up to the starting position.

**DUMBBELL DEADLIFT — 15 reps**

Set a pair of dumbbells on the floor in front of you. Bend at your hips and knees, and grab the dumbbells with an overhand grip. Without allowing your lower back to round, stand up with the dumbbells and thrust your hips forward. Lower your body back to the starting position.

### CARDIO + STRENGTH TRAINING COMBINED (CONT.)

**SUPERMAN** — Hold for 1 min

Lie facedown on the floor with your legs straight and arms out ahead of you. Your palms should be down on the floor. Squeeze your glutes and lower back to raise your upper body off the floor with your hands out in front of you. Simultaneously, lift your straight legs off the floor. Pause at the top for two seconds. Relax and return to the starting position.

**STEP-UP WITH DUMBBELL** — 30 reps each side

Stand behind an exercise bench or box. Hold a dumbbell in each hand at your sides and place your right foot on the box. Shift your weight onto your right leg to step onto the box. Keep the help from your left leg to a minimum. Finish by stepping onto the box with your left leg. Step your left leg down. Do all reps with your right leg, switch sides, then repeat.

**PLANK** — Hold for 1 min

Lie facedown with your elbows directly beneath your shoulders and raise your torso into the air until it’s a completely straight line from your shoulders to your ankles. Tighten your stomach, squeeze your glutes, and hold.

**BICYCLE SIT-UPS** — Do continuously for 1 min

Lie on your back with your knees bent and feet flat on the floor. Place your hands behind your head, palms toward your head. Bring your knees to your chest and raise your shoulders. Slowly move your legs in the air as if you’re riding a bike.

**SEATED CABLE ROW** — 25 reps

Sit at a low pulley cable station with a V-handle attachment. Place feet securely on the platform and, using your legs (not your back), sit back into the start position with your arms fully extended and supporting the weight. Keeping your torso stationary, drive your elbows past your back and pull the cable attachment toward the waist. Attempt to squeeze shoulder blades together and hold this contraction for a second. Return the weight until arms are fully extended, and repeat the movement. To end the set, return the weight to the starting position by bending at the knees and not the lower back.

**SQUAT JUMP** — 15 reps

Place your fingers on the back of your head and pull your elbows back so that they’re in line with your body. Dip your knees in preparation to leap. Explosively jump as high as you can. When you land, immediately squat down and jump again.
