STRENGTH TRAINING

WEIGHT SUPERSETS
A superset means doing two consecutive exercises back to back without a rest. Use a low to medium weight that feels challenging. You don’t have to overdo it with weight because the workout includes lots of reps, continuing to build lean muscles and muscle endurance.

Superset 1 (3 times; rest 30 secs before starting Superset 2)

DUMBBELL DEADLIFT
Set a pair of dumbbells on the floor in front of you. Bend at your hips and knees, and grab the dumbbells with an overhand grip. Without allowing your lower back to round, stand up with the dumbbells and thrust your hips forward. Lower your body back to the starting position.

Round 1: 8 reps
Round 2: 10 reps
Round 3: 15 reps

SQUAT JUMP
Place your fingers on the back of your head and pull your elbows back so that they’re in line with your body. Dip your knees in preparation to leap. Explosively jump as high as you can. When you land, immediately squat down and jump again.

Round 1: 8 reps
Round 2: 10 reps

**HIGH-PULL BURPEE – 8 reps**

Grab a set of dumbbells with an overhand grip and stand tall with your feet shoulder-width apart. Bend down and place dumbbells on the ground before hopping into a pushup position. Perform a pushup, then quickly spring your legs forward to the bottom of a squat and stand up tall. As you stand, shrug the dumbbells up as high as you can, then lower the weights to your sides to return to start.

**KNEELING DUMBBELL REAR FLY – 15 reps**

Grab a set of dumbbells and get on all fours on the ground. Grip the dumbbells directly beneath your shoulders with your palms facing each other. Make sure your knees are directly beneath your hips. Maintaining a slight bend in the elbow, lift one arm straight out to the side until it is parallel with the ground. Keep your back flat and core tight the entire time. Pause, and then lower the weight back to the starting position. Repeat for the prescribed number of sets and repetitions and then switch arms.

**DUMBBELL ROW – 15 reps**

Stand with feet shoulder-width apart and holding a dumbbell in each hand. Bend the knees slightly and bend at the waist with your back straight. Avoid rounding the upper back, and keep the head neutral. Extend your arms fully so each dumbbell is just above the floor. Contract your back and pull both dumbbells up to your rib cage. Be sure to pull through the elbow and hold for one second in the top position. Lower the dumbbells to the fully extended arm position and repeat.

**TRICEPS DUMBBELL KICKBACK – 15 reps each side**

Kneel over one side of a weight bench by placing the right knee and right hand on the bench. Position the left leg slightly back and to the side with the left foot firmly planted on the floor. The torso should be parallel to the floor. Grab a dumbbell with the left hand with an overhand grip, and position the elbow at your side so the upper arm is parallel to the floor. Now extend the left arm to full extension by contracting the triceps.

**MODIFIED SIT-UP — 25 reps**

Lie on your back with your knees bent to 90 degrees and feet flat on the floor. Keep your arms straight against your sides, palms facing down and hovering slightly above the floor. Tighten your abs and raise your torso until you’re sitting up at a 45-degree angle, pausing for a moment before returning to the floor. Perform all reps.

**HOVERING SIT-UP — 20 reps**

Start by sitting with your feet and upper back off the ground and knees bent toward your chest, placing your hands behind your head for support and balance. Make sure not to pull at your neck. Tighten your abs and straighten your legs out completely while leaning back, touching your lower back to the ground while making sure that your shoulders remain in the air. Use your abs to crunch up and return to the starting position, repeating for the desired number of repetitions.

**SWISS BALL RUSSIAN TWIST — 15 reps each side**

Lie with your back on a Swiss ball. Your feet should be flat on the floor with your knees bent at 90 degrees. Clasp your hands together directly above your chest with straight elbows. Carefully rotate your arms to the side. The ball will roll across your back to your shoulder. Keep your hips up by squeezing your glutes. Rotate back to the starting position. Repeat on the opposite side. Complete all reps.

**SIDE PLANK WITH TWIST — 12 reps each side**

Lie on your side and position yourself on your bottom elbow and the side of your bottom foot. Lift your hips off the ground, so your body forms a straight line from your shoulders to your feet. Brace your abs and squeeze your butt. Take your top arm and sweep underneath and slightly behind you. Your torso will twist forward; make sure to pivot your feet. Bring your arm back to the starting position as your body straightens out. Finish the rep with your shoulders square and your arm pointed toward the ceiling. Do all reps, switch sides, and repeat.

BICEPS/TRICEPS – Mid-Weight Workout

*Circuit 1 (3 times; rest for 30 secs at the end of each circuit)*

**PUSHUP – 12 reps**

Get on all fours, and place your hands on the floor slightly wider than and in line with your shoulders. Your body should form a straight line from your ankles to your shoulders. Squeeze your abs as tight as possible and keep them contracted for the entire exercise. Lower your body until your chest nearly touches the floor, making sure that you tuck your elbows close to the sides of your torso. Pause, then push yourself back to the starting position.

**JUDO PUSHUP – 10 reps**

Get in the pushup position with legs wider than hip-width apart and arms directly underneath your shoulders. Step feet in slightly toward your hands and lift your hips so that your body forms an inverted V. Keeping your core tight and elbows close to the body, bend your arms and lower your chest to the floor. At the bottom of the movement, swoop your head and shoulders upward while lowering your hips until they almost touch the floor. Reverse the motion and return to start.

*Circuit 2 (3 times; rest for 30 secs at the end of each circuit)*

**CABLE CROSSOVER**

Begin in a staggered stance with your body positioned in the middle of a dual cable machine with one weight stack on either side of you. Adjust the handles so they’re slightly lower than shoulder height and grab the handles so your palms are facing forward and your arms are roughly parallel with the ground. Maintain a slight bend in the elbows. Contract your pecs and pull your arms together in front of you, keeping a slight forward lean from the waist up. Pause, and then slowly return the weight back to the starting position.

**ALTERNATING DUMBBELL CURL**
Stand with feet shoulder-width apart, holding a dumbbell in each hand with an overhand grip and palms facing your sides. Curl the right dumbbell toward the right shoulder by flexing the elbow. The other dumbbell should remain at your left side. Try to minimize moving the elbow (shoulder flexion) or cheating with the lower back. As you curl the weight up, twist the pinky finger of the working arm toward the ceiling. This intensifies the contraction in the biceps.

*Hold at the top for 1 sec and return to the starting position, and then repeat the movement using the left dumbbell.*

**Round 1:** 15 reps each side  
**Round 2:** 10 reps each side  
**Round 3:** 8 reps each side

**STACKED FEET PUSHUP**
Get in the standard pushup position with your hands slightly wider than shoulder-width apart and elbows completely locked out. Keeping one foot planted on the ground, pick the other foot up and place it on the heel of the planted foot. Keeping your core tight, slowly lower yourself toward the ground. Make sure to keep your elbows tucked in close by your sides so they make a 45-degree angle with your torso. Once your chest touches the ground, pause, and then press back up to the starting position. Repeat for the prescribed number of sets and reps.

Facing the pulley station, grab the V-handle attachment, set to a high pulley with a shoulder-width, overhand grip. Holding the attachment and supporting the weight, bring your elbows to your sides so your forearms are parallel to the floor. This is the starting position and from here your elbows shouldn’t move.
